SUBJ: PROCEDURE FOLLOWED TO DOCUMENT ***"FOX 11 News"*** STORIES

It is my responsibility to archive all information, and print out a weekly log to be placed in the FCC Programs and Issues Report. Here is the procedure I follow.

Throughout the day, video is edited for "on-air" presentation, and then is sent to a server in the Newsroom.

Each Newscast is titled on the server and the video used "on-air" is compiled onto an archive tape.

A log is created for each archive tape. This log includes information relating to the show, video title, and length of each piece.

The rundown for each newscast is opened and the following information is listed: archive tape number; length of video, format, and a short description of the segment content.

This procedure must be done daily and in a timely manner to insure that video is retained and available for future use.
