Subject: FCC PI SEPT. REPORT

********** **FCC REPORTS SEPTEMBER 2 007** **********

========== **09.01.07**
========== **PA-CANCER CURE PATENT (19 SEC)**

A BIG STEP FOR CANCER TREATMENT. EARLIER THIS WEEK, A LEUKEMIA PATIENT FOUND OUT THE U-S PATENT OFFICE GAVE
PRELIMINARY APPROVAL FOR HIS MACHINE THAT TREATS CANCER USING RADIO WAVES. JOHN KANZIUS IS NOT A DOCTOR. HE IS A FORMER T-V AND RADIO ENGINEER. FINAL APPROVAL IS EXPECTED TO TAKE THREE TO SIX MONTHS. THE INVENTION IS ALREADY PATENTED IN EUROPE. BY THE WAY, RESULTS FROM ANIMAL TESTING, WILL BE RELEASED IN OCTOBER OR NOVEMBER.

========== **09.02.07**
========== **VEGGIES MAY LOWER AGGRESSIVE PROSTATE CANCER RISK (18 SECS.)**

MEN MAY BE ABLE TO HALVE THEIR RISK OF AGGRESSIVE PROSTATE CANCER BY ADDING LARGE AMOUNTS OF BROCCOLI AND CAULIFLOWER TO THEIR MENU. HOWEVER, THE OVERALL RISK OF PROSTATE CANCER WAS NOT CHANGED. IN A STUDY OF NEARLY 30,000 MEN, DR. RICHARD B. HAYES OF THE NATIONAL CANCER INSTITUTE IN BETHESDA, MARYLAND AND COLLEAGUES FOUND THAT MEN WHO ATE MORE THAN A SERVING OF EITHER VEGETABLE EACH WEEK HAD ROUGHLY HALF THE RISK OF DEVELOPING ADVANCED-STAGE PROSTATE CANCER -- THAT HAD SPREAD BEYOND THE PROSTATE GLAND -- COMPARED WITH THEIR PEERS WHO ATE THESE VEGETABLES LESS THAN ONCE A MONTH.

========== **09/03/07**
========== **LATE NIGHT CELL USE CUTS INTO TEENS' SLEEP (16 SECS.)**

RESEARCHERS IN BELGIUM REPORTED 62 PERCENT OF ADOLESCENTS USE THEIR CELL PHONES AFTER BEDTIME. THEY ATTRIBUTE CELL PHONE USE TO 35 PERCENT OF CASES OF ADOLESCENTS BEING TIRED, WITH LEVELS OF EXHAUSTION VARYING BASED ON THE FREQUENCY OF LATE-NIGHT USE AND HOW LATE INTO THE NIGHT TEENS ARE TALKING AND TEXTING. SLEEP EXPERTS IN THE UNITED STATES SAID THESE STATISTICS HOLD TRUE FOR TEENS HERE, AS WELL. DR. KOHLER RECOMMENDS PARENTS MONITOR THEIR CHILD'S CELL PHONE USE AND TAKE AWAY OTHER PRIVILEGES IF IT IS USED AFTER BEDTIME RATHER THAN TAKING THE PHONE AWAY.

========== **09/04/07**
========== **MANY U.S. ATTENTION DEFICIT CASES UNTREATED (18 SECS.)**

NEW RESEARCH SUGGESTS THERE ARE EASY NON-DRUG ALTERNATIVES TO HELP KIDS WHO SUFFER FROM ATTENTION DEFICIT HYPERACTIVITY DISORDER. THE STUDY FOCUSED ON PRESCHOOLERS. THE SIMPLE THERAPIES GIVE MORE STRUCTURE TO A PRESCHOOLER'S DAY. THE TECHNIQUES INCLUDED STRESSING CONSISTENT RULES AND ROUTINES, AND GIVING MORE PRAISE FOR GOOD BEHAVIOR THAN PUNISHMENT FOR BAD. BETWEEN THREE PERCENT AND FIVE

02/04/2013 18:42 IFAX admin.fax@saintetv.com → Accounting 00:15:46 02-05-2013 1 /3 7074459451 001/003

PERCENT OF SCHOOL-AGE CHILDREN ARE THOUGHT TO HAVE ADHD. ADHD DRUGS ARE NOT FORMALLY APPROVED FOR USE IN PRESCHOOLERS, AND WHILE THEY MAY HELP SOME, SIDE EFFECTS ARE MORE COMMON IN YOUNGER CHILDREN, INCLUDING A WORRISOME SLOWING OF GROWTH.

========== 09/05/07
========== **OVERWEIGHT? IT MAY BE IN YOUR GENES (20 SECS.)**

ONE SINGLE GENE MAY BE TO BLAME FOR THE BODY'S TENDENCY TO PILE ON FAT. FROM FRUIT FLIES TO HUMANS, MOST CREATURES HAVE A GENE THAT RESEARCHERS NOW BELIEVE MAY ACT AS A SENSOR THAT TELLS THE BODY WHETHER OR NOT TO ACCUMULATE FAT. A TEAM OF RESEARCHERS AT UNIVERSITY OF TEXAS SOUTHWESTERN MEDICAL CENTER IN DALLAS, TEXAS, LEAD BY JONATHAN GRAFF, M.D., ASSOCIATE PROFESSOR OF DEVELOPMENTAL BIOLOGY AND INTERNAL MEDICINE, SET OUT TO STUDY A GENE CALLED ADIPOSE, WHICH WAS DISCOVERED IN OVERWEIGHT FRUIT FLIES MORE THAN 50 YEARS AGO.

========== 09/06/07
========== **TEEN CANCER SURVIVORS SHOW MOOD AND BEHAVIOR PROBLEMS (14 SECS.)**

ACCORDING TO A RECENT REPORT, TEENAGERS WHO'VE SURVIVED CHILDHOOD CANCERS MAY BE MORE LIKELY THAN THEIR SIBLINGS TO BE DEPRESSED OR ANXIOUS, HAVE ATTENTION PROBLEMS OR SHOW ANTISOCIAL BEHAVIORS. LEUKEMIA, TUMORS OF THE BRAIN OR SPINE, AND NEUROBLASTOMA -- A CANCER THAT ARISES IN NERVE TISSUE -- WERE ALL RELATED TO HIGHER RISKS OF EMOTIONAL AND BEHAVIORAL PROBLEMS.

========== 09/07/07
========== **TEEN SUICIDES RATES SPIKE (16 SECS.)**

THE SUICIDE RATE AMONG PRETEEN AND YOUNG TEEN GIRLS SPIKED DRAMATICALLY IN A DISTURBING SHIFT THAT FEDERAL HEALTH OFFICIALS SAY THEY CAN'T FULLY EXPLAIN. FOR ALL YOUNG PEOPLE BETWEEN AGES 10 TO 24, THE SUICIDE RATE ROSE 8 PERCENT FROM 2003 TO 2004 -- THE BIGGEST SINGLE-YEAR BUMP IN 15 YEARS. THE BIGGEST INCREASE WAS IN THE SUICIDE RATE FOR 10- TO 14-YEAR-OLD GIRLS. THERE WERE 94 SUICIDES IN THAT AGE GROUP IN 2004, COMPARED TO 56 IN 2003, A 67 PERCENT INCREASE.

========== 09.08.07
========== **CELL PHONES IN HOSPITALS (16 secs.)**

A NEW DUTCH STUDY ON MOBILE PHONE SIGNALS FINDS THAT USING A CELL PHONE IN RESTRICTED AREAS, SUCH AS HOSPITALS, CAN BE DANGEROUS. IN THE STUDY, PUBLISHED WEDNESDAY IN THE ONLINE JOURNAL *CRITICAL CARE*, RESEARCHERS MEASURED THE IMPACT OF ELECTROMAGNETIC INTERFERENCE (EMI) FROM CELL PHONE USE ON HOSPITAL EQUIPMENT SUCH AS VENTILATORS AND PACEMAKERS. SIGNALS THAT WERE EQUAL IN STRENGTH TO THOSE GIVEN OFF BY SECOND- AND THIRD-GENERATION MOBILE PHONES SIGNIFICANTLY INTERFERED WITH MEDICAL DEVICES, AND THE STUDY'S AUTHORS CATEGORIZED 75% OF THOSE INCIDENTS AS "HAZARDOUS," MEANING THAT THE INTERFERENCE HAD A DIRECT IMPACT ON PATIENT HEALTH, OR "SIGNIFICANT," INDICATING THAT IT DISTRACTED HEALTH CARE PROVIDERS. HAZARDOUS INCIDENTS INCLUDED THE SUDDEN SWITCHING OFF OR RESTARTING OF MACHINES - WHICH COULD MEAN DISRUPTION OF A PATIENT'S FEEDING TUBE, VENTILATOR, PACEMAKER OR DIALYSIS MACHINE - AND MOST EVENTS OCCURRED WHEN MOBILE PHONES WERE WITHIN 3 CM OF CRITICAL-CARE EQUIPMENT.
