THE SCANDAL SWIRLING AROUND FORMER FLORIDA CONGRESSMAN MARK FOLEY CONTINUES TO WIDEN. THE FBI HAS OPENED AN INVESTIGATION INTO WHETHER FOLEY VIOLATED FEDERAL LAW BY SENDING SEXUALLY EXPLICIT E-MAILS TO MALE CONGRESSIONAL PAGES UNDER 18. THAT'S ON TOP OF A POSSIBLE HOUSE ETHICS COMMITTEE INVESTIGATION AND A CALL FROM HOUSE SPEAKER, REPUBLICAN DENNIS HASTERT, ECHOED BY OTHERS IN HIS PARTY , FOR THE JUSTICE DEPARTMENT AND FLORIDA LAW ENFORCEMENT TO LOOK INTO THE MATTER. THE BEST THING TO DO ON EVERY COUNT IS TO GET THE FACTS OUT THERE AS QUICKLY AS POSSIBLE AND THEN LET THE CHIPS FALL AS THEY MAY." BUT DEMOCRATS SAY IT'S TOO LITTLE TOO LATE. THEY ACCUSE THE REPUBLICANS OF A COVER-UP TO MAINTAIN THEIR MAJORITY IN CONGRESS. "IT LOOKS TO ME THAT IT WAS MORE IMPORTANT TO HOLD ONTO A SEAT AND TO HOLD ONTO POWER THAN TO TAKE CARE OF OUR CHILDREN." REPUBLICANS HAVE KNOWN ABOUT FOLEY'S OBSESSION WITH MALE PAGES FOR AT LEAST FIVE YEARS. BUT LITTLE WAS DONE, OTHER THAN ISSUING A WARNING. ABC NEWS OBTAINED INTERNET MESSAGES SENT BY FOLEY TO THREE DIFFERENT PAGES SINCE THAT WARNING WAS ISSUED. MESSAGES SENT TO TWO PAGES CONTAINED SEXUALLY EXPLICIT MESSAGES, MOST TOO GRAPHIC TO BE BROADCAST. THIS DOES THROW PLANS TO HOLD ONTO FOLEY'S SEAT INTO DISARRAY. A REPLACEMENT WILL BE CHOSEN TODAY, BUT FOLEY'S NAME WILL STILL BE ON THE BALLOT, AND THE NEW CANDIDATE WILL ONLY HAVE FIVE WEEKS TO CAMPAIGN.

THE STUDY FOUND THAT A GAIN OF 3 OR MORE BMI OR BODY MASS INDEX UNITS IS ASSOCIATED WITH AN INCREASED RISK OF PREECLAMPSIA, GESTATIONAL HIGH BLOOD PRESSURE, GESTATIONAL DIABETES, NEED FOR C-SECTION, STILL BIRTH, AND LARGE BABIES. THE AUTHORS SAY THE STUDY SUPPORTS A PUSH FOR GETTING WOMEN WHO ARE OVERWEIGHT OR OBESE TO LOSE WEIGHT BEFORE BECOMING PREGNANT, AND TO PREVENT WEIGHT GAIN IN WOMEN WHO ARE OF HEALTHY WEIGHT. A NEW FEDERAL LAW GOES INTO EFFECT SATURDAY THAT REQUIRES THE DRUG PSEUDOEPHEDRINE, BE TAKEN OFF STORE SHELVES. YOU'LL STILL BE ABLE TO BUY IT...BUT THERE'S MORE RIGAMAROLE. "SO NOW WHAT YOU DO, INSTEAD OF GETTING A BOX OF MEDICATION, YOU GET A PIECE OF PAPER, YOU WALK UP TO THE COUNTER, AND YOU ASK FOR THE MEDICATION BEHIND THE COUNTER. AND YOU'RE ONLY ALLOWED 3.6 GRAMS OF PSEUDOEPHEDRINE A MONTH." "THERE'S A TWELVE HOUR, THERE'S A REGULAR NON DROWSY." A SUDAFED TABLET IS 60 MILLIGRAMS...SO THAT'S 60 TABLETS A MONTH PER PERSON...AND YOU'LL HAVE TO SIGN FOR IT AND SHOW YOUR ID..."IT'S THE EXACT SAME PRODUCT THAT WAS ON THE SHELF IT'S THE SAME PRICE IT'S AVAILABLE WITHOUT A PRESCRIPTION AND IT'S STILL SAFE AND EFFECTIVE."THERE ARE STILL DECONGESTANTS ON THE SHELVES...BUT THERE IS A DIFFERENCE.... IT'S A DIFFERENT CHEMICAL... THE "PE" IN SUDAFED PE, FOR EXAMPLE...A DIFFERENT MEDICATION THAN PSEUDOEPHEDRINE. "RIGHT NOW WHAT YOU'LL FIND ON THE SHELVES ARE PHENYLEPHRINE PRODUCTS, HOWEVER CONSUMERS NEED TO KNOW YOU NEED TO TAKE THESE MEDS EVERY FOUR HOURS, THEY'RE VERY SHORT ACTING, IF THEY NEED LONG ACTING RELIEF YOU HAVE TO GO BEHIND THE COUNTER AND ASK THE PHARMACIST." THE REASON FOR THE LAW: PSEUDOEPHEDRINE IS THE PRIMARY INGREDIENT IN PRODUCING ETHAMPHETAMINE. INDIVIDUAL STATES THAT HAVE ALREADY RESTRICTED THE SALE OF PSEUDOEPHEDRINE TO BEHIND THE COUNTER HAS TRIGGERED A REDUCTION IN THE NUMBER OF METH LABS. IN FACT, POSSIESSION OF PSEUDOEPHEDRINE FOR THE PURPOSE OF MANUFACTURING METH IS A FELONY. PUTTING THESE DRUGS BEHIND

THE COUNTER WILL PREVENT THIS MISUSE AS WELL AS REDUCE THE NUMBER OF THEFTS. IT'S A LOT OF CONCERN AND ATTENTION OVER A DRUG INTENDED FOR THE SNIFFLES.

IT MIGHT COME AS A SURPRISE TO LEARN THAT THE GOVERNMENT SAYS EVERY YEAR THE SEASONAL FLU KILLS ABOUT 36-THOUSAND AMERICANS AND HOSPITALIZES ABOUT 200-THOUSAND..... BUT ACCORDING TO A NEW SURVEY BY THE NATIONAL FOUNDATION FOR INFECTIOUS DISEASES OF MORE THAN 1000 ADULTS (1,014) NEARLY HALF (48%) SAY THEY DON'T PLAN TO GET VACCINATED -- AND OF THOSE -- NEARLY HALF SAY THEY DON'T THINK THE FLU IS SERIOUS ENOUGH TO WARRANT A SHOT. FOR SOME PEOPLE IT CAN BE VERY DANGEROUS. THE PEOPLE WHO ARE AT THE RISK OF SERIOUS COMPLICATIONS FROM INFLUENZA THE ELDERLY PEOPLE, PEOPLE WITH CHRONIC MEDICAL CONDITIONS, PEOPLE WHO ARE IN HEALTH CARE SETTINGS BECAUSE THEY CAN POSE A RISK TO THEMSELVES AND THEIR PATIENTS YOUNG CHILDREN BETWEEN THE AGES OF 6 MONTHS AND 5 YEARS OF AGE SHOULD ALSO BE VACCINATED ACCORDING TO THE CENTERS FOR DISEASE CONTROL. ANOTHER COMMON MISCONCEPTION: ALMOST HALF (46%) OF THOSE SURVEYED SAID THEY THOUGHT THE VACCINATION COULD ACTUALLY CAUSE THE FLU. THE TRUTH: IT'S IMPOSSIBLE TO GET THE FLU FROM THE SHOT BECAUSE IT'S MADE FROM A KILLED VIRUS. THE NASAL SPRAY FLU VACCINE CALLED FLUMIST IS MADE FROM A LIVE VIRUS THAT IS WEAKENED TO THE POINT THAT IT IS UNLIKELY TO MAKE YOU SICK. ANOTHER MISTAKE: 15% OF THOSE WHO DON'T PLAN TO BE IMMUNIZED SAID SINCE THEY HAD BEEN VACCINATED BEFORE, THEY DIDN'T NEED IT AGAIN. ACTUALLY THE STRAIN OF THE FLU CHANGES EVERY YEAR ENOUGH THAT THE PREVIOUS YEAR'S VACCINE NO LONGER WORKS. A NEW VACCINE IS NECESSARY EVERY YEAR.

RESEARCHERS LOOKED AT THE SUICIDE RISK FOR MORE THAN 700,000 BREAST CANCER SURVIVORS DIAGNOSED BETWEEN 1953 AND 2001. THEY FOUND THE RISK WAS HIGHEST AMONG BLACK WOMEN AND INCREASED AT THE HIGHER STAGES OF BREAST CANCER. BUT WHETHER OR NOT A BREAST WAS REMOVED WAS NOT A FACTOR. RESEARCHERS SAY LONG-TERM FOLLOW-UP PROGRAMS FOR THESE SURVIVORS SHOULD INCLUDE PYSCHO-SOCIAL SERVICES. A NEW STUDY FROM THE AMERICAN CANCER SOCIETY SAYS A REDUCTION IN CIGARETTE SMOKING HAS RESULTED IN A 40 PERCENT DROP IN CANCER DEATH RATES IN MEN BETWEEN 1991 AND 2003--PREVENTING AT LEAST 146,000 CANCER DEATHS DURING THAT TIME. RESEARCHERS GAVE HAY FEVER SUFFERERS 6 ONCE-A-WEEK SHOTS OF EITHER AN EXPERIMENTAL VACCINE OR DUMMY SHOTS, AND HOPED THE SHOTS WOULD REDUCE NASAL REACTIONS WHEN VOLUNTEERS CAME IN CONTACT WITH RAGWEED IN THE LAB. THE EXPERIMENTAL INJECTIONS ACTUALLY DID NOT REDUCE THESE NASAL REACTIONS, BUT THE VACCINE DID IMPROVE SYMPTOMS IN VOLUNTEERS WHO GOT THE VACCINATION. AND THOSE BENEFITS APPEARED TO LAST LONG AFTER THE FIRST SHOT HAD BEEN GIVEN. THE 14 FOLKS WHO RECEIVED THE VACCINE REPORTED AN AVERAGE OF 60 PERCENT FEWER SYMPTOMS SUCH AS SNEEZING, RUNNY NOSE, RUNNY EYES, ITCHY EARS AND ITCHY THROATS COMPARED TO THOSE WHO DID NOT RECEIVE THE VACCINE. AND 8 PEOPLE WHO THE SCIENTISTS CONTINUED TO FOLLOW AFTER THE STUDY WAS OVER CONTINUED TO BENEFIT EVEN 2 YEARS AFTER THEY STOPPED RECEIVING THE SHOTS. THIS STUDY IS ONLY PRELIMINARY, SO LARGER STUDIES ARE NEEDED. SOME WOMEN DRINK DIET COLA TO CONTROL CALORIES, BUT A NEW STUDY SUGGESTS THAT DIET, REGULAR, AND DECAFFEINATED COLA CAN ACTUALLY LOWER BONE DENSITY AND PUT WOMEN EVEN MORE AT RISK FOR OSTEOPOROSIS. ROUGHLY 55 PER CENT OF AMERICANS, MOSTLY WOMEN, ARE AT RISK OF DEVELOPING THE BRITTLE BONE DISEASE, AND COLA SEEMS TO INCREASE THAT RISK. RESEARCHERS LOOKED AT DATA FROM 2,500 PEOPLE WHO WERE PART OF A LONG TERM HEALTH STUDY. THE SCIENTISTS COMPARED HOW MUCH COLA AND OTHER SODAS PEOPLE DRANK TO BONE MINERAL DENSITY MEASUREMENTS TAKEN FROM THE SPINE AND FROM THREE DIFFERENT SPOTS ON THE HIPS. WOMEN WHO DRANK MORE COLA HAD REDUCED BONE MINERAL DENSITY AT ALL 3 HIPS SITES - BUT NOT AT THE SPINE. THE LINK BETWEEN COLA AND WOMEN'S BONE LOSS WAS UNAFFECTED BY AGE, MENOPAUSAL STATUS, CIGARETTES, ALCOHOL, OR TOTAL CALCIUM AND VITAMIN D INTAKE. MEN DID NOT LOSE BONE DENSITY WITH INCREASED COLA CONSUMPTION, AND OTHER SODAS BESIDES COLA WERE NOT LINKED TO BONE LOSS. THE STUDY AUTHORS SAY THAT WOMEN CONCERNED ABOUT OSTEOPOROSIS MIGHT WANT TO STEER CLEAR OF HEAVY COLA CONSUMPTION.

"WE'RE PROBABLY MISSING ABOUT A THIRD OF CANCERS ON THE FIRST BIOPSY GO ROUND SO WE BELIEVE THIS MACHINE REDUCES THAT MISS RATE AND THAT IS SOMETHING WE WOULD LIKE TO TEST IN OUR UPCOMING CLINICAL TRIAL." THE DOCTOR SIMPLY DIALS THEM IN, AND INSERTS THE NEEDLE, WHICH GOES THROUGH THE EXACT PATHS FOR BIOPSY. THIS MACHINE IS SO NEW IT'S ONLY IN 5 MEDICAL CENTERS AROUND THE COUNTRY. IT'S SOMETIMES REFERRED TO AS THE HEARTBREAK OF PSORIASIS. THAT COULDN'T BE FARTHER FROM THE TRUTH, IN A LITERAL SENSE. NOW, NEW RESEARCH IN THE LATEST JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION SHOWS THAT ADULTS WITH PSORIASIS, ESPECIALLY YOUNGER INDIVIDUALS, ARE AT AN INCREASED RISK FOR HEART ATTACK. "PSORIASIS IS SUCH A COMPLICATED DISEASE; MOST PEOPLE THAT DEVELOP THE DISEASE EARLIER IN LIFE, IN THEIR 20S AND 30S, IT MAY BE THAT THESE FOLKS ARE THE ONES WHO MAY HAVE THE HIGHEST RISK OF DEVELOPING UH HEART ATTACKS RELATED TO PSORIASIS IF THEIR DISEASE IS SEVERE, AS OPPOSED TO PEOPLE WHO DEVELOP PSORIASIS LATER ON IN LIFE."UNDERSTAND THAT PSORIASIS IS A DISEASE OF INFLAMMATION. AND THERE ARE INFLAMMATORY MARKERS IN THE BLOOD, LIKE ONE CALLED C-REACTIVE PROTEIN, WHICH ARE ELEVATED WITH PSORIASIS. THE FACT IS, HEART DISEASE IS ALSO A CONDITION OF INFLAMMATION, AND C-REACTIVE PROTEIN CAN ALSO BE ELEVATED WITH HEART BLOCKAGES. "SO OTHER CHRONIC IMMUNE CONDITIONS, LIKE RHEUMATOID ARTHRITIS, HAVE ALREADY BEEN SHOWN TO BE ASSOCIATED WITH HIGHER RISKS OF HAVING A HEART ATTACK INDEPENDENT OF THESE MAJOR CARDIOVASCULAR RISKS FACTORS." THE AUTHORS SAY THE DEGREE OF ASSOCIATION BETWEEN SEVERE PSORIASIS AND HEART ATTACK IN PATIENTS YOUNGER THAN 50 IS SIMILAR TO THE MAGNITUDE OF ASSOCIATION FOR OTHER MAJOR CARDIAC RISK FACTORS. THE BAD NEWS FOR ERNIE BICKFORD, WHO IS 72 YEARS OLD, IS THAT HE HAS HAD A BAD CASE OF PSORIASIS FOR EIGHT YEARS NOW. 'IT'S JUST ITCHY, YOU WAKE UP IN THE MIDDLE OF THE NIGHT AND YOU GOT TO GET TO A DOOR JAM TO SCRATCH YOUR BACK." FORTUNATELY, THE GOOD NEWS IS, BECAUSE ERNIE IS OLDER, PSORIASIS IS NOT A HEART ATTACK RISK THAT WOULD BE SEEN IN A YOUNGER PSORIASIS PATIENT. REGARDLESS, ALL PSORIASIS PATIENTS NEED TO PAY CLOSE ATTENTION TO THEIR ENTIRE MEDICAL CARE. "PEOPLE WITH PSORIASIS ARE MORE LIKELY TO HAVE

DIABETES; THEY'RE MORE LIKELY TO BE OVERWEIGHT; THEY'RE MORE LIKELY TO HAVE ELEVATED BLOOD LIPIDS, THEY'RE MORE LIKELY TO BE HYPERTENSIVE, AND ALSO THEY TEND TO BE MORE LIKELY TO SMOKE. SO THE PATIENT SHOULD ASK THEIR DERMATOLOGIST TO SCREEN THEM FOR CARDIOVASCULAR RISK FACTORS OR IF NOT FOLLOW UP WITH A PRIMARY DOCTOR OR INTERNIST WHO CAN DO THESE SCREENINGS FOR THEM."

ACCORDING TO NEW RESEARCH IN THE ARCHIVES OF NEUROLOGY, PATIENTS WITH VERY MILD COGNITIVE LOSS...THOSE AT THE BEGINNING OF THEIR DECLINE...DID HAVE A SLOWING OF THE LOSS OF THEIR MENTAL ABILITIES.

WELL, THAT OLD ADVISE IS ALL WRONG. IN FACT, NEW RESEARCH SHOWS A DAILY TRIP TO THE SCALE MAY HELP DIETERS MAINTAIN THEIR WEIGHT LOSS OVER THE LONG TERM. PATIENTS WHO WEIGHED IN DAILY HAD AN 82% LOWER LIKELIHOOD OF REGAINING FIVE OR MORE POUNDS OVER 18 MONTHS COMPARED WITH THOSE THAT DID NOT WEIGH IN DAILY. TYPICALLY, DIETERS REGAIN ONE THIRD OF THE WEIGHT LOST OVER THE NEXT YEAR AND ALL OF IT IN THREE TO FIVE YEARS, AND DAILY WEIGHING COULD PERHAPS KEEP THE PERSON'S MIND ON THE TASK AT HAND...TO MAINTAIN THAT WEIGHT LOSS.
AND A NEW STUDY IN THE ARCHIVES OF OPHTHALMOLOGY SAYS THAT OLDER ADULTS WITH VISION LOSS MAY BE MORE LIKELY TO ALSO HAVE HEARING LOSS, AND VICE-VERSA. AND, FOR EACH ADDITIONAL LINE ON THE EYE CHART THAT AN INDIVIDUAL COULD NOT READ, HIS OR HER ODDS OF HAVING HEARING IMPAIRMENT INCREASED BY 13 TO 18 PERCENT DEPENDING UPON THE SEVERITY OF THE VISION LOSS. WHEN THE RESEARCHERS LOOKED SPECIFICALLY AT THE TWO MOST COMMON CAUSES OF AGE-RELATED VISION IMPAIRMENT, CATARACTS AND AGE-RELATED MACULAR DEGENERATION, THEY FOUND THAT BOTH WERE INDEPENDENTLY ASSOCIATED WITH HEARING LOSS.

SEAFOOD HAS LONG BEEN THOUGHT TO STAVE OFF HEART DISEASE. "THAT'S HOW YOU DO IT. IT'S REAL GOOD." BUT CONCERNS OVER POSSIBLE CONTAMINANTS - INCLUDING MERCURY, WHICH CAN DELAY DEVELOPMENT IN CHILDREN - HAVE SCARED SOME CONSUMERS AWAY FROM FISH. NOW, A NEW REPORT SAYS THE PROS OF EATING SEAFOOD OUTWEIGH THE CONS. "WE THINK THOSE LEVELS ARE LEVELS THROUGH WHICH YOU CAN STILL MANAGE THE RISKS, AND YOU CAN PROBABLY DERIVE SOME BENEFIT."THE STUDY, CONDUCTED BY THE INSTITUTE OF MEDICINE, FOUND EATING SEAFOODS RICH IN OMEGA-THREE FATTY ACIDS TWICE A WEEK BENEFITED PEOPLE OF ALL AGES -- INCLUDING NEWBORNS AND PREGNANT WOMEN, WHO THE GOVERNMENT HAS ADVISED TO *AVOID* CERTAIN TYPES OF FISH.
THE REPORT SAYS REGULATORS NEED TO BE CLEARER ABOUT WHICH TYPES OF SEAFOOD ARE MORE OR LESS PRONE TO CONTAMINATION - BUT RESEARCHERS SAY THEY COULD NOT LIST GOOD AND BAD FISH."BY CONSUMING A VARIETY OF SPECIES, THE BENEFITS CAN BE MAXIMIZED BUT THE OVERALL RISK PROFILE CAN BE MANAGED." CRITICS SAY THE STUDY CREATES EVEN MORE CONFUSION - AND PUTS THE YOUNGEST AMERICANS AT RISK. IN A WRITTEN STATEMENT, THE CONSUMERS UNION - WHICH PUBLISHES "CONSUMER REPORTS" -- SAID THE STUDY FAILS TO "TAKE INTO ACCOUNT THE VARIATIONS IN MERCURY LEVELS FOUND IN CANS OF LIGHT AND WHITE TUNA //. (AND) THE POTENTIAL IMPACT ON THE MOST VULNERABLE POPULATIONS." RESEARCHERS WERE NOT ABLE TO CONCLUDE EXACTLY *HOW* SEAFOOD PROTECTS THE HEART. THEY SAID IT COULD BE THAT THE BENEFITS SIMPLY COME FROM NOT EATING RED MEAT.

ARE YOU AFRAID OF GOING TO THE HOSPITAL? WELL THERE'S GOOD AND BAD NEWS THIS WEEK FROM HEALTH GRADES - ONE OF THE LEADING HOSPITAL RATINGS COMPANIES IN THE UNITED STATES. THE GOOD NEWS - OVERALL, AMERICAN HOSPITALS ARE GETTING BETTER AND SAFER. THE RISK OF DYING DURING A HOSPITAL STAY IS STEADILY DECREASING - 66 OUT OF EVERY 1000 PATIENTS DIED IN US HOSPITALS IN 2005. THE BAD NEWS IS THAT THE GAP BETWEEN QUALITY HOSPITALS AND INFERIOR ONES IS GETTING LARGER. AND THE DISPARITY THEY SAY CAN BE THE DIFFERENCE BETWEEN LIFE - AND DEATH. A TYPICAL PATIENT FOR EXAMPLE HAS AN ALMOST 70 PERCENT LOWER RISK OF DYING AT WHAT HEALTH GRADES CALLS A "5-STAR" HOSPITAL COMPARED TO THE AVERAGE PATIENT IN A LOWER QUALITY "1- STAR" HOSPITAL. IN FACT, THEY SAY THAT IF ALL U.S. HOSPITALS OPERATED AT THE 5 STAR LEVEL, MORE THAN 150,000 LIVES COULD BE SAVED EVERY YEAR. TO CHECK ON THE QUALITY OF YOUR HOSPITALS, EXPERTS RECOMMEND GETTING ADVICE FROM DOCTORS AND FRIENDS, USING ON LINE SITES SUCH AS HEALTH GRADES AND LEAP FROG, AND PRINT SOURCES LIKE U.S. NEWS AND WORLD REPORT.

"A KEY FINDING WAS THAT JUST A FEW DRUGS COST LARGE NUMBERS FOR THESE EMERGENCY VISITS, FOR EXAMPLE AMONGST SENIORS JUST THREE DRUGS INSULIN, WARFRIN AND DIGOXIN ACCOUNTED FOR ONE THIRD OF EMERGENCY VISITS FOR DRUG COMPLICATIONS. AND WHAT THESE DRUGS HAVE IN COMMON IS THAT THEY HAVE TO BE DOSED CAREFULLY AND REQUIRE PERIODIC TESTING TO PREVENT OVERDOSES." INSULIN FOR DIABETES, WARFARIN OR COUMADIN, A BLOOD THINNER USED FOR BLOOD CLOTS AND HEART RHYTHM ABNORMALITIES...AND DIGOXIN FOR HEART FAILURE... NOW THESE ARE THREE INCREDIBLY COMMON DRUGS...FOR COMMON PROBLEMS...DIABETES BEING THE MOST COMMON...AND INSULIN A WIDELY PRESCRIBED DRUG. "IF THE PATIENT TAKES THE DOSE HE IS SUPPOSE TO TAKE IN THE MORNING BUT THEM DOESN'T EAT THAT COULD BE LABELED AS AN UNINTENTIONAL OVERDOSE OR MAYBE JUST BLOOD SUGAR WAS LOWER BUT HE DIDN'T CHECK WHAT HIS SUGAR WAS IN THE MORNING AND UNINTENTIONALLY GAVE HIMSELF TOO MUCH INSULIN." ARE THESE THE DOCTOR'S FAULT, OR THOSE OF THE PATIENTS? OR NOONE'S?A THIRD OF THE ADVERSE DRUG REACTIONS WERE ALLERGIC REACTIONS."I THINK EDUCATION DEFINITELY PLAYS A BIG ROLE, BUT WHAT I USUALLY SEE IN THE EMERGENCY ROOM IS THESE PATIENTS WILL TAKE THEIR ORAL DIABETES MEDICATION OR TAKE THEIR INSULIN AND NOT EAT AND THEN TWO, THREE, FOUR, FIVE HOURS LATER THEY'LL COME TO THE ER WITH A, A VERY LOW BLOOD SUGAR. STUDIES SUGGEST EATING FISH REGULARLY LEADS TO BETTER BRAIN DEVELOPMENT AND A REDUCED RISK OF HEART DISEASE BUT THERE'S A CATCH. ALL FISH CONTAIN DIOXINS, P-C-B'S AND MERCURY -- SOME MORE THAN OTHERS -- AND MERCURY IS OF PARTICULAR CONCERN BECAUSE IT'S KNOWN TO CAUSE DELAYS IN BRAIN DEVELOPMENT. FOR THAT REASON PREGNANT WOMEN AND YOUNG CHILDREN HAVE OFTEN GOTTEN MIXED MESSAGES ABOUT HOW MUCH FISH TO EAT. A NEW REPORT FROM THE INSTITUTE OF MEDICINE...IS TRYING TO CLARIFY. THE BENEFITS OF CARDIOVASCULAR HEALTH FROM EATING SEAFOOD, INCLUDING FARM FISH, FAR OUTWEIGH THE RISK OF CANCER FROM ENVIRONMENTAL CONTAMINANTS. FOR WOMEN WHO COULD BECOME PREGNANT AND YOUNG CHILDREN, THE COMMITTEE SAYS THEY CAN EAT UP TO 12-OUNCES OF SEAFOOD A WEEK WITHOUT BEING CONCERNED ABOUT MERCURY. SIX OUNCES CAN BE ALBACORE TUNA, ALTHOUGH CANNED LIGHT TUNA USUALLY CONTAINS LESS MERCURY. THEY SHOULD AVOID FISH HIGH IN MERCURY LIKE SHARK, SWORDFISH, KING MACKEREL AND TILEFISH. THOSE WHO CONSUME MORE THAN TWO SERVINGS A WEEK SHOULD CHOOSE A VARIETY OF SEAFOOD TO REDUCE RISK FROM EXPOSURE TO CONTAMINANTS FROM A SINGLE SOURCE. AND THERE'S MORE EVIDENCE THIS WEEK THAT FISH REDUCES THE RISK OF HEART DISEASE. IN "THE JOURNAL OF THE AMERICAN MEDICAL ASSOCIATION," RESEARCHERS FROM HARVARD SCHOOL OF PUBLIC HEALTH FOUND EVEN JUST EATING ONE TO TWO SERVINGS OF FISH A WEEK REDUCES THE RISK OF DEATH FROM HEART DISEASE BY 36-PERCENT.

I THINK ONE OF THE REASONS WE SEE SO MANY MORE NECK AND BACK PROBLEMS IS WE'RE NOT AS ACTIVE AS WE USED TO BE. DOCTOR MICHAEL SCHAUFELE (SHAW-FLEA) SAYS HE TREATS A LOT OF PEOPLE WHO SIT AT A COMPUTER ALL DAY OR HOLD A PHONE ON ONE SIDE OF THEIR HEAD, BENDING THEIR NECK. HE SAYS THOSE PATIENTS ARE STRAINING THEIR MUSCLES. IN THOSE CASES, THE DOCTOR RECOMMENDS TAKING ANTI-INFLAMMATORY MEDICINE LIKE IBUPROFEN OR NAPROXEN TO RELIEVE THE PAIN. WE REALLY DON'T RECOMMEND BED REST ANYMORE. WE HAVE FOUND OVER THE YEARS THAT BEING ACTIVE AND MAINTAINING YOUR REGULAR ACTIVITIES IS MUCH MORE EFFECTIVE IN THE LONG RUN THAN BEING COMPLETELY STILL IN THE BED. IF YOU HURT YOUR BACK, DOCTORS SAY IT'S OKAY TO REST FOR A LITTLE WHILE. BUT THEY ADD, MOST BACK PAIN IS TEMPORARY AND YOU SHOULD BE FEELING BETTER WITHIN A WEEK. YOU'LL WANT TO AVOID BENDING AND LIFTING, OTHERWISE DOCTORS SAY IT'S IMPORTANT TO GET MOVING AGAIN.

MOS "I LOVE WHITE WINE." MOS "A PINOT GRIGIO...THAT'S THE BEST." IF YOU'RE PARTIAL TO WHITE WINE...MAYBE YOU SHOULD RECONSIDER FOR YOUR HEALTH'S SAKE. A GLASS OF CABERNET MAY SERVE YOUR BRAIN BETTER! WHILE THERE HAS NOT BEEN A LOT OF RESEARCH TO DATE ON WINE AND POTENTIAL BRAIN BENEFITS, THERE'S NEW RESEARCH OUT OF JOHNS HOPKINS WHICH SUGGESTS THAT RED WINE MAY HELP PROTECT HE BRAIN FROM DAMAGE AFTER A STROKE...AND IT MIGHT EVEN PROVIDE PROTECTION AHEAD OF TIME. THE RESEARCHERS USED MICE LIKE THESE...NO, THEY DIDN'T GET THEM DRUNK....BUT THEY FED THEM A MODERATE DOSE OF A COMPOUND FOUND IN RED GRAPE SKINS AND SEEDS BEFORE INDUCING STROKE-LIKE DAMAGE. THOSE GETTING THE COMPONENT CALLED RESVERATROL...SUFFERED LESS BRAIN DAMAGE THAN SIMILARLY DAMAGED MICE WHO WERE NOT TREATED. THE KEY: PROTECTION AGAINST HARMFUL FREE RADICALS WHICH CAN CAUSE NERVE CELL DESTRUCTION. FREE RADICALS ARE THE ELEMENTS WE ARE CONCERNED ABOUT IN BRAIN ISCHEMIA IN OTHER WORDS WHEN THE BRAIN ISN'T GETTING ENOUGH BLOOD FLOW FOR WHATEVER REASON, AND THIS PARTICULAR ELEMENT MAY BLOCK THE RELEASE OF FREE RADICALS WHICH CAUSE THE BRAIN DAMAGE BY PRETREATING THE MICE OR OTHER MAMALLS WITH THIS ELEMENT IN RED WINE." YES, THERE IS ALREADY RESEARCH TO SUGGEST RED WINE CAN HELP THE HEART... BUT THE BRAIN IS EVEN NEEDIER. THE HEART IS BASICALLY BASED ON MUSCLE, THE BRAIN IS BASED ON NERVE CELLS THAT ARE CONSTANTLY

FIRING HENCE THEY HAVE A GREATER OXYGEN DEMAND." THERE ARE OTHER BENEFITS OF ALCOHOL IN MODERATION...SUCH AS RAISING THE GOOD, OR HDL CHOLESTEROL, WHICH ATTACKS AND PREENT FATTY CHOLESTEROL PLAQUE FROM FORMING IN ARTERIES. IN TRUTH, ALL TYPES OF ALCOHOL MAY...MAY PROVIDE BENEFIT IN TERMS OF RAISING THE GOOD OR HDL CHOLESTEROL, WHICH MINIMIZES THE RISK OF ARTERY BLOCKAGES...A SEPARATE, BUT IMPORTANT FACTOR IN STROKE. AND IF THE COMPONENT..THE RESVERATROL...COULD BE ISOLATED OUT...THAT COULD BE A BENEFICIAL WIN...IN PREVENTING STROKE OR MINIMIZING ITS DAMAGE. IF THIS IS INDEED THE ELEMENT THAT'S THERE AND THEY CONFIRM AND TAKE IT OUT OF THE FERMENTATION PROCESS AND MAKE IT A COMMERCIAL PRODUCT, THIS COULD BE TREMENDOUSLY BENEFICAL FOR SOCIETY AS A WHOLE. I'M NOT SAYING THIS IS THE CURE ALL FOR STROKE."

THERE WAS ALSO ONE MORE BENEFIT - WOMEN IN THE EXERCISE GROUP LOST WEIGHT AND REDUCED THEIR TOTAL BODY FAT. SO FAR THERE REALLY ISN'T ANY SUPER FOOD OR SUPER GROUP OF FOODS THAT'S EMERGED FOR CANCER PREVENTION. DOCTOR WILLETT SAYS UP TO 35-PERCENT OF CANCERS IN THE U-S ARE DUE TO NUTRITIONAL FACTORS, BUT MOST OF THOSE CASES ARE RELATED TO OBESITY AND INACTIVITY, NOT A PARTICULAR DIET. WE'VE KNOWN FOR YEARS THAT OBESITY IS STRONGLY RELATED TO RISK OF HEART DISEASE AND DIABETES BUT EVEN MINOR OVERWEIGHT IS ALSO A RISK FACTOR FOR MANY IMPORTANT CANCERS. THE AMERICAN CANCER SOCIETY ALSO SAYS MAINTAINING A HEALTHY WEIGHT AND BEING ACTIVE ARE IMPORTANT FOR CANCER PREVENTION. IT RECOMMENDS LIMITING INTAKE OF HIGH FAT FOODS AND ALCOHOL AND CHOOSING MOST FOODS FROM PLANT SOURCES.
