- 01/07/99 **"The Killer Next Door"**- in 1979, Donald Miller, a graduate of Michigan State University who majored in criminal justice, was sentenced to 30 to 50 years for rape and attempted murder, but was suspected in the unsolved murders of four other local young women. In a highly unusual plea bargain, Miller agreed to work with police in trying to recover his memories of other murders. The deal -- if he was successful in remembering, Miller would plead guilty to manslaughter charges for the other murders and no additional time would be added to his sentence. After serving 20 years, Miller was up for parole and only the discovery that he had in his possession, while in prison, a strangulation device in the form of a shoelace, has kept from going free. Currently a bill which could keep serial predators locked up is before the Michigan legislature. Almost ten years later there is evidence that the child's death may have been caused by a little-known condition called osteogenesis imperfecta or Brittle Bone Disease, but so far no court will hear the case. - 03/24/99 **"The Lost Children"**- from 1947 to 1967 the British government, in collaboration with churches and charities, came up with a secret plan to relieve the problem of overcrowded children's homes. Thousands of the children were shipped to Australia where, they were told, they would be adopted. Rather than being placed with families, the children were taken to institutions run by the Christian Brothers where they were used as laborers, given inadequate food, and subjected to physical and sexual abuse.
